

# THE BISON MECHANICAL PARK BRAKE

The Bison mechanical brake's calipers can create an impressive 2,500 pounds of clamp force. Like the animal, these brakes have stamina and stopping power that make them unrivaled in the turf vehicle industry.

- ▶ **FLOATING MOUNT**  
makes fitting easy for retrofit and OEM applications
- ▶ **DURABLE**  
even in the harshest environments. Proven to withstand an aggressive 96-hr. salt spray test
- ▶ **CW AND CCW ACTUATION**  
can be easily integrated into a variety of systems without the need for unique handed components for each side of the vehicle
- ▶ **UP TO 2,500 LBF. OF CLAMP FORCE**  
holds even the heaviest ZTRs. Maximum input force of 2,000 lbf.
- ▶ **MULTIPLE LEVER OFFSET OPTIONS**  
make it easy to fit in a variety of vehicle types, including ZTRs & turf equipment, golf carts, UTVs

## THE IDEAL MECHANICAL BRAKE FOR LAWN & TURF, UTV & GOLF CART OEMS AND DEALERS

### OEMS

Spec brakes that make your equipment more attractive to buyers. Safety is among their key purchase considerations, and Bison's 2,500 lbf. gives them added confidence.

### DEALERS & SERVICE DEPARTMENTS

Upgrade older mechanical brakes to Bison to improve the equipment's stopping power, helping assure buyers of the safety and performance of the vehicle.

### SPECIFICATIONS

Weight	2.4 lbs.
Rotor Diameter	5 to 8.5 in.
Rotor Thickness	.125 to .260 in.
Lining Type	Non-Asbestos Organic
Lever Offset	0 to 2.9 in.

### TORQUE INFORMATION

5 in. Rotor	▶ <b>200 LBF X 4700 IN-LB</b>
8.5 in. Rotor	▶ <b>200 LBF X 8700 IN-LB</b>
